*The definition of what is and what is not classed as a true “Family Bible” versus just a regular bible is rather “slippery”. A very liberal definition has been applied here and even in a few cases a family genealogical record is cited where no Family Bible is known to exist . In most cases either an image or a transcription of the bible is found at the Bible.

+ But, in some cases it may just be a reference to the fact that the bible exists and some description and that the acquisition of a transcription or image is pending.
